

Sturhan wants a six.

21st May: German Pro Stock racer Harald Sturhan and his team put in a lot of work on his Mercedes over the off-season says Dennis Engelmann:

Next to the normal engine revision, we made some fine adjustments to the engine to increase performance a little bit. We also increased the weight of the CLK, therefore we built a new lighter front and made some minor corrections to the chassis. We also have new lighter doors, but they are not yet finished, but I think they will be ready for the second race. We have changed the axle drive ratio a little bit, so that it will better fit the quarter mile. I think that's all from the technical side.

Apart from that, we have a little change in the paint job and we have two new sponsors for this season. The first is Wiley X, a manufacturer of sports sunglasses, and the other is Melzer-Motors, a Harley tuner in Germany. Our team will also be equipped with Wiley X sunglasses and these sunglasses will also be available at our new race shop! We also have a new T-Shirt and a new autograph card - the autograph card is of course a freebie!

We want a six-second run, and I think we will get one at the Main Event, as when everything works it should be no problem for the lighter and improved car. Our main aim for this season is named "Qualifying" as we want to qualify in all races of the season. Beside that, it would be very nice if Harry could win some races. The last two things we wish for the season are no technical problems and no crashes!
